

I am writing to ask that you support the Jordan Lake rules as proposed with the implementation date moved up from 2016 to 2011.

It is past time that we address the issues that have caused Jordan Lake to become so polluted. The proposed rules are reasonable, fair to all parties involved, and will go a long way toward reclaiming Jordan Lake as a vibrant and healthy body of water.

We also can't afford to allow the lake to deteriorate for another nine years before new rules take effect. That makes the 2011 implementation date imperative.

Thank you for your time.
